Solutions by function and task. SAP Data Maintenance. When business users make mass changes to data as part of SAP data maintenance, they often first extract the data into a more user-friendly format, such as an Excel spreadsheet, make the changes, and then upload the data back into SAP. With Winshuttle Query and Transaction, users can extract, update, validate, and upload SAP data from the familiar Excel interface, all while adhering to SAP corporate security and governance standards.

---

## SAP Data Maintenance Made Easy | Winshuttle Software

Data is first transferred into the PSA and then into the DataStore object. Not possible to use the DataStore object as the source of a further real-time data transfer into another DataStore object/Cube. Master data cannot be transferred to the BI Navigation attributes of the characteristic could no longer be used in aggregates. Because

Legacy Data Transfer Purpose. If you want to repeat the implementation of the Transaction Manager (FIN-FSCM-TRM-TM) and your data (legacy data) is in a source system, you need to make sure this data is available in the Transaction Manager for a key date.. Legacy data needs to be transferred to the system in a number of steps and can be done in various ways.
